INDEX OF SUBJECTS

Abelmoschus esculentus, *see* Okra

Acid lime (*Citrus aurantifolia*) and the distribution of root activity in it (Kurien, Goswami and Deb), 431

Adaptation, genotypic, and improving it in crops – a role for breeders, physiologists and modellers (Shorter, Lawn and Hammer), 155

Advances in Soil Science: Volume 14, ed. by B. A. Stewart, reviewed by D. S. Jenkinson, 339

Advances in Soil Science: Volume 10, ed. by B. A. Stewart, reviewed by P. Loveland, 88

Africa, southern, and farming systems adaptive research: achievements and prospects (Low and Waddington), 115

Age of harvesting after pod set and its effects on the growth, yield and quality of okra (*Abelmoschus esculentus*) (Iremiren, Osara and Okiy), 33

Agricultural Compendium for Rural Development in the Tropics and Subtropics, ed. by EUROCONSULT, reviewed by J. M. Hirst, 89

Agricultural Extension in Africa, ed. by N. Roberts, reviewed by T. Harding, 88

Agricultural Mechanisation: Issues and Options. A World Bank Policy Study, by H. P. Binswanger and Graeme Donovan, reviewed by R. J. Godwin, 87

Agro-economic analysis of field trials from a farming systems research perspective: weed control in rainfed lowland rice in Senegal (Posner and Crawford), 231

Agronomic and economic perspectives and their integration into the diagnostic stage of on-farm research (Byerlee, Triomphe and Sebillotte), 95

Alfalfa and wheat productivity under intercropping (Abdel Magid, Ghoneim, Rabie and Sabrah), 391

Amazonian bush fallow agriculture and the role of weeds in its productivity (Staver), 287

Applied Plant Virology, by D. Walkey, reviewed by J. M. Thresh, 339

Assimilate supply and sink capacity and their control of grain yield in various rice (*Oryza sativa*) cultivars (Fukai, Li, Vizmonte and Fischer), 127

Balochistan and rain-fed crop production systems in the uplands: wheat (*Triticum aestivum*), barley (*Hordeum vulgare*) and forage legumes (*Vicia* species) (Rees, Islam, Samiullah, Rehman, Raza, Qureshi and Mehmood), 53

Barley (*Hordeum vulgare*), wheat (*Triticum aestivum*) and forage legumes (*Vicia* species) in rain-fed crop production systems of upland Balochistan: (Rees, Islam, Samiullah, Rehman, Raza, Qureshi and Mehmood), 53

Bolivia and the search for a viable alternative to slash and burn agriculture in the lowland plains (Wilkins), 39

Breeders, physiologists and modellers and their role in improving genotypic adaptation in crops (Shorter, Lawn and Hammer), 155

Bush fallow agriculture in the Amazonian region and the role of weeds in its productivity (Staver), 287

Camellia sinensis, *see* Tea

Cameroon and the effects of sweet potato virus disease (SPVD) on the yield of sweet potato genotypes there (Ngeve and Bouwkamp), 221

Canola and Rapeseed: Production, Chemistry, Nutrition and Processing, ed. by F. Shahidi, reviewed by W. G. Hughes, 445

Categorization of rice farmers in the Dominican Republic to aid the identification of target groups for agricultural research (Doorman), 243

Cereal/cotton rotations in Mali and a comparison of the application of natural rock phosphate with imported cotton fertilizer to them (Kagbo), 263

Client-oriented on-farm research in national agricultural research systems and institutional considerations in strengthening it: lessons from a nine-country study (Merrill-Sands, Biggs, Bingen, Ewell, McAllister and Poats), 343

Climate Change and World Agriculture, by Martin Parry, reviewed by J. Porter, 444

Clonal selection in tea (*Camellia sinensis*) and the use of growth measurements and foliar nutrient content as criteria (Nyirenda), 47

Competition, water and nitrogen effects on the growth, yield and yield components of field-grown tepary bean (Nelson, Nabhan and Robichaux), 211

CoStat-Statistical Software, reviewed by R. D. Stern, 87

Cotton/cereal rotations in Mali and a comparison of the application of natural rock phosphate with imported cotton fertilizer to them (Kagbo), 263

Cowpea (*Vigna unguiculata*) and observations on insect infestation and damage when intercropped with tomato (*Lycopersicon esculentum*) in a rain forest area of Nigeria (Ofuya), 407

Cowpea and an evaluation of short and tall sorghum varieties in mixtures with it in the Sudan savanna of Nigeria: land equivalent ratio, grain yield and system productivity index (Odo), 435
Cowpea/maize relay cropping in the Gambia and the effect of tied ridge cultivation on its yield and that of maize grown alone (Wright, Posner and Doll), 269
Criteria for clonal selection in tea (*Camellia sinensis*); the use of growth measurements and foliar nutrient content (Nyirenda), 47
Crop Protection Chemicals Reference – Sixth Edition, reviewed by E. C. Hislop, 228
Crop Rotation Studies on the Canadian Prairies, by C. A. Campbell, R. P. Zentner, H. H. Jantzen and K. E. Bowren, reviewed by J. Nowland, 341

Defoliation and the effect of its intensity and timing on growth, yield components and grain yield in maize (Yao, Yeboua and Kafrouma), 137
Density of planting and technique of planting and their effect on yield of late planted sugarcane in north central India (Yadav, Kumar and Verma), 281
Design of Experiments (The): Statistical Principles for Practical Application, by R. Mead, reviewed by G. V. Dyke, 229
Development of K-Fertilizer Recommendations, reviewed by J. B. D. Robinson, 340
Diagnostic stage, the, of on-farm research and integrating agronomic and economic perspectives into it (Byerlee, Triomphe and Sebillotte), 95
Dominican Republic and the categorization of rice farmers there as an aid to identifying target groups for agricultural research (Doorman), 243
Dry matter and nitrogen accumulation and partitioning in field grown winged bean (Weil and Beimont), 323
Dry seasons in northern Nigeria and the growth and yield of maize genotypes during them (Yunusa and Gworgwor), 397

Early maturing maize (*Zea mays*) variety and its introduction to a mid-altitude farming system in Ethiopia (Negassa, Tolessa, Franzel, Gedeno and Dadi), 375
Ecology of Arable Land: Organisms, Carbon and Nitrogen Cycling, ed. by O. Andren, T. Lindberg, K. Paustian and T. Rosswall, reviewed by Keith A. Smith, 89
Economic and agronomic perspectives and their integration into the diagnostic stage of on-farm research (Byerlee, Triomphe and Sebillotte), 95
Environmental Fate of Pesticides, ed. by D. H. Hutson and T. R. Roberts, reviewed by K. J. Brent, 227
Ethiopia and the introduction of an early maturing maize (*Zea mays*) variety to a mid-altitude farming system there (Negassa, Tolessa, Franzel, Gedeno and Dadi), 375
Ethiopian *Trifolium* species intercropped with wheat (Kahurananga), 385
Evaluation of *Rhizobium* survival in two carriers new to Sudan (Elshafie and Elhussein), 319
Evaluation of short and tall sorghum varieties in mixtures with cowpea in the Sudan savanna of Nigeria: land equivalent ratio, grain yield and system productivity index (Odo), 435

Farmer cropping choices or researcher cropping pattern trapezoids as the approach to improving the productivity of an upland rice and maize system? (Fujisaka), 253
Farming system, a, at mid-altitude in Ethiopia and the introduction of an early maturing maize (*Zea mays*) variety there (Negassa, Tolessa, Franzel, Gedeno and Dadi), 375
Farming systems adaptive research: achievements and prospects in southern Africa (Low and Waddington), 115
Farming systems perspective, the, and its institutionalization in multi-commodity research institutes: the role of systems-based research groups (Spencer), 1
Farming systems research perspective and its use in an agro-economic analysis of field trials: weed control in rainfed lowland rice in Senegal (Posner and Crawford), 231
Fertilizer and irrigation and the responses of tea (*Camellia sinensis*). I. Yield; II. Water use (Stephens and Carr), 177
Fertilizer from natural rock phosphate compared with imported cotton fertilizer in cotton/cereal rotations in Mali (Kagbo), 263
Flowering in six annual crops and the reliable prediction of its timing. I. The development of simple models for fluctuating field environments (Summerfield, Roberts, Ellis and Lawn), 11
Foliar nutrient content and growth measurements and their use as criteria for clonal selection in tea (*Camellia sinensis*) (Nyirenda), 47
Forage legumes (*Vicia* species), wheat (*Triticum aestivum*) and barley (*Hordeum vulgare*) in rain-fed crop production systems of upland Balochistan: (Rees, Islam, Samiullah, Rehman, Raza, Qureshi and Mehmood), 53

Gambia, the, and the effect of tied ridge cultivation on the yield of maize and a maize/cowpea relay there (Wright, Posner and Doll), 269
Genotypic adaptation and improving it in crops – a role for breeders, physiologists and modellers (Shorter, Lawn and Hammer), 155

Gezira Irrigation Scheme in Sudan (The): Objectives, Design and Performance, by H. Plusquellec, reviewed by R. Carter, 228

Government Intervention in Agriculture: Cause and Effect, ed. by B. Greenshields and M. Bellamy, reviewed by N. Chalmers, 88

Grain yield and its control by sink capacity and assimilate supply in various rice (*Oryza sativa*) cultivars (Fukai, Li, Vizmonte and Fischer), 127

Grain yield and its physiology in wheat in an irrigated tropical environment (Ishag and Ageeb), 71

Grain yield, yield components and growth in maize as affected by the intensity and timing of defoliation (Yao, Yeboua and Kafrouma), 137

Great Ascent (The): The Rural Poor of South Asia, by Indergit Singh, reviewed by G. A. Watson, 340

Growth and yield of lentil in a rainfed Mediterranean environment as affected by sowing date (Silim, Saxena and Erskine), 145

Growth and yield of maize genotypes during dry seasons in northern Nigeria (Yunusa and Gworgwor), 397

Growth measurements and foliar nutrient content and their use as criteria for clonal selection in tea (*Camellia sinensis*) (Nyirenda), 47

Growth, yield and leafminer damage in a mixed planting of potato cultivars in the cool tropics (Midmore and Alcazar), 305

Growth, yield and quality of okra (*Abelmoschus esculentus*) as affected by age of harvesting after pod set (Iremiren, Osara and Okiy), 33

Growth, yield and yield components of field-grown tepary bean as affected by water, nitrogen and competition (Nelson, Nabhan and Robichaux), 211

Growth, yield components and grain yield in maize as affected by the intensity and timing of defoliation (Yao, Yeboua and Kafrouma), 137

Harvesting age after pod set and its effects on the growth, yield and quality of okra (*Abelmoschus esculentus*) (Iremiren, Osara and Okiy), 33

Hordeum vulgare, *see* Barley

India, north central, and the effect of planting technique and planting density on yield of late planted sugarcane there (Yadav, Kumar and Verma), 281

Insect infestation and damage in cowpea (*Vigna unguiculata*) intercropped with tomato (*Lycopersicon esculentum*) in a rain forest area of Nigeria (Ofuya), 407

Institutional considerations in strengthening on-farm client-oriented research in national agricultural research systems: lessons from a nine-country study (Merrill-Sands, Biggs, Bingen, Ewell, McAllister and Poats), 343

Intercropped cowpea (*Vigna unguiculata*) and tomato (*Lycopersicon esculentum*) and observations of insect infestation and damage in the cowpea component in a rain forest area of Nigeria (Ofuya), 407

Intercropping Ethiopian *Trifolium* species with wheat (Kahurananga), 385

Intercropping of wheat and alfalfa and their productivity under this system (Abdel Magid, Ghoneim, Rabie and Sabrah), 391

International Agricultural Research: A Database of Networks, by D. L. Plucknett, N. J. H. Smith and S. Ozgediz, reviewed by J. M. Hirst, 443

Irrigated tropical environment, an, and the physiology of grain yield in wheat grown there (Ishag and Ageeb), 71

Irrigation and fertilizer and the responses of tea (*Camellia sinensis*). I. Yield; II. Water use (Stephens and Carr), 177

Isozymes in Plant Biology, by D. E. Soltis and P. S. Soltis, reviewed by P. R. Shewry, 228

Land equivalent ratio, grain yield and system productivity index used in an evaluation of short and tall sorghum varieties in mixtures with cowpea in the Sudan savanna of Nigeria (Odo), 435

Leafminer damage, growth and yield in a mixed planting of potato cultivars in the cool tropics (Midmore and Alcazar), 305

Lentil growth and yield in a rainfed Mediterranean environment as affected by sowing date (Silim, Saxena and Erskine), 145

Lycopersicon esculentum, *see* Tomato

Maize (*Zea mays*) and the introduction of an early maturing variety to a mid-altitude farming system in Ethiopia (Negassa, Tolessa, Franzel, Gedeno and Dadi), 375

Maize and a maize/cowpea relay in the Gambia and the effect of tied ridge cultivation on their yield (Wright, Posner and Doll), 269

Maize and rice and improving the productivity of an upland system: farmer cropping choices or researcher cropping pattern trapezoids? (Fujisaka), 253

Maize and the effect of the intensity and timing of defoliation on its growth, yield components and grain yield (Yao, Yeboua and Kafrouma), 137

Maize and the effects of a previous crop of winged bean (Weil and Samarnayake), 329

Maize and the growth and yield of genotypes during dry seasons in northern Nigeria (Yunusa and Gworgwor), 397

Mali and a comparison of natural rock phosphate with imported cotton fertilizer in cotton/cereal rotations there (Kagbo), 263

Mediterranean environment, rainfed, and the effect of sowing date on the growth and yield of lentil there (Silim, Saxena and Erskine), 145
Mixed planting of potato cultivars: growth, yield and leafminer damage in the cool tropics (Midmore and Alcazar), 305
Mixed row cropping of early and late maturing rice varieties and its effect on crop productivity under intermediate deepwater conditions (Reddy, Sharma and Panda), 79
Mixtures of cowpea with short and tall sorghum varieties in the Sudan savanna of Nigeria: an evaluation based on land equivalent ratio, grain yield and system productivity index (Odo), 435
Modellers, breeders and physiologists and their role in improving genotypic adaptation in crops (Shorter, Lawn and Hammer), 155

National agricultural research systems and institutional considerations in strengthening on-farm client-oriented research in them: lessons from a nine-country study (Merrill-Sands, Biggs, Bingen, Ewell, McAllister and Poats), 343
Networking in International Agricultural Research, by D. L. Plucknett, N. J. Smith and S. Ozgediz, reviewed by D. J. Greenland, 339
Nigeria and observations on insect infestation and damage in cowpea (*Vigna unguiculata*) intercropped with tomato (*Lycopersicon esculentum*) in a rain forest area there (Ofuya), 407
Nigeria and the evaluation of short and tall sorghum varieties in mixtures with cowpea in the Sudan savanna region there: land equivalent ratio, grain yield and system productivity index (Odo), 435
Nigeria, northern, and the growth and yield of maize genotypes during dry seasons there (Yunusa and Gworgwor), 397
Nitrogen and dry matter accumulation and partitioning in field grown winged bean (Weil and Belmont), 323
Nitrogen Fixing Organisms – Pure and Applied Aspects, by Janet I. Sprent and Peter Sprent, reviewed by D. Gareth Jones, 443
Nitrogen, water and competition effects on the growth, yield and yield components of field-grown tepary bean (Nelson, Nabhan and Robichaux), 211
Nutrient content of leaves and growth measurements as criteria for clonal selection in tea (*Camellia sinensis*) (Nyirenda), 47

Okra (*Abelmoschus esculentus*) and the effects of age of harvesting after pod set on its growth, yield and quality (Iremiren, Osara and Okiy), 33
On-farm client-oriented research in national agricultural research systems and institutional considerations in strengthening it: lessons from a nine-country study (Merrill-Sands, Biggs, Bingen, Ewell, McAllister and Poats), 343
On-farm research and integrating agronomic and economic perspectives into the diagnostic stage (Byerlee, Triomphe and Sebillotte), 95
Oryza sativa, *see* Rice

Partitioning and accumulation of dry matter and nitrogen in field grown winged bean (Weil and Belmont), 323
Pesticide Effects on Terrestrial Wildlife, ed. by I. Somerville and C. H. Walker, reviewed by B. D. Smith, 227
Phosphate from natural rock compared with imported cotton fertilizer in cotton/cereal rotations in Mali (Kagbo), 263
Phosphates from rock in agriculture (Le Mare), 413
Physiological Fruit Tree Training for Intensive Growing, by T. Brunner, reviewed by A. I. Campbell, 444
Physiologists, breeders and modellers and their role in improving genotypic adaptation in crops (Shorter, Lawn and Hammer), 155
Physiology of grain yield in wheat in an irrigated tropical environment (Ishag and Ageeb), 71
Planting mixed potato cultivars: growth, yield and leafminer damage in the cool tropics (Midmore and Alcazar), 305
Planting technique and planting density and their effect on yield of late planted sugarcane in north central India (Yadav, Kumar and Verma), 281
Pod set and the effects of age of harvesting on the growth, yield and quality of okra (*Abelmoschus esculentus*) (Iremiren, Osara and Okiy), 33
Potatoes planted as a mix of cultivars: growth, yield and leafminer damage in the cool tropics (Midmore and Alcazar), 305
Practical Handbook of Agricultural Science, ed. by A. A. Hansen, reviewed by L. J. Foster, 229
Prediction of time to flowering in six annual crops. I. The development of simple models for fluctuating field environments (Summerfield, Roberts, Ellis and Lawn), 11
Productivity of Amazonian bush fallow agriculture and the role of weeds in it (Staver), 287
Productivity of an upland rice and maize system and its improvement: farmer cropping choices or researcher cropping pattern trapezoids? (Fujisaka), 253
Productivity of early and late maturing rice varieties under intermediate deepwater conditions as affected by mixed row cropping (Reddy, Sharma and Panda), 79
Productivity of wheat and alfalfa under intercropping (Abdel Magid, Ghoneim, Rabie and Sabrah), 391

Prospects for Agroforestry in the Tropics (The), by P. K. R. Nair, reviewed by R. R. B. Leakey, 445

Quality, growth and yield of okra (*Abelmoschus esculentus*) as affected by age of harvesting after pod set (Iremiren, Osara and Okiy), 33

Rain forest area of Nigeria and observations on insect infestation and damage in cowpea (*Vigna unguiculata*) intercropped with tomato (*Lycopersicon esculentum*) there (Ofuya), 407

Rain-fed crop production systems of upland Balochistan: wheat (*Triticum aestivum*), barley (*Hordeum vulgare*) and forage legumes (*Vicia* species) (Rees, Islam, Samiullah, Rehman, Raza, Qureshi and Mehmood), 53

Rain-fed lowland rice in Senegal and weed control: an agro-economic analysis of field trials from a farming systems research perspective (Posner and Crawford), 231

Rain-fed Mediterranean environment, a, and the effect of sowing date on the growth and yield of lentil there (Silim, Saxena and Erskine), 145

Remote sensing and its use to assess the effects of water stress on wheat (Mahey, Singh, Sidhu and Narang), 423

Research institutes, multi-commodity, and the institutionalizing of the farming systems perspective in them: the role of systems-based research groups (Spencer), 1

Researcher cropping pattern trapezoids or farmer cropping choices as the approach to improving the productivity of an upland rice and maize system? (Fujisaka), 253

Rhizobium and an evaluation of its survival in two carriers new to Sudan (Elshafie and Elhussein), 319

Rice (*Oryza sativa*) and the control of grain yield by sink capacity and assimilate supply in various cultivars (Fukai, Li, Vizmonte and Fischer), 127

Rice and maize and improving the productivity of an upland system: farmer cropping choices or researcher cropping pattern trapezoids? (Fujisaka), 253

Rice and the effect of mixed row cropping of early and late maturing varieties on crop productivity under intermediate deepwater conditions (Reddy, Sharma and Panda), 79

Rice farmers in the Dominican Republic and their categorization as an aid to identifying target groups for agricultural research (Doorman), 243

Rice, rainfed lowland, and weed control in Senegal: an agro-economic analysis of field trials from a farming systems research perspective (Posner and Crawford), 231

Rock phosphate compared with imported cotton fertilizer in cotton/cereal rotations in Mali (Kagbo), 263

Rock phosphates in agriculture (Le Mare), 413

Root activity and its distribution in acid lime (*Citrus aurantifolia*) (Kurien, Goswami and Deb), 431

SCUAF: Soil Changes under Agroforestry (A Predictive Program), by A. Young and P. Muraya, reviewed by N. Bradbury, 446

Senegal and weed control in rainfed lowland rice: an agro-economic analysis of field trials from a farming systems research perspective (Posner and Crawford), 231

Sink capacity and assimilate supply and their control of grain yield in various rice (*Oryza sativa*) cultivars (Fukai, Li, Vizmonte and Fischer), 127

Slash and burn agriculture in the lowland plains of Bolivia and the search for a viable alternative (Wilkins), 39

Sorghum and the evaluation of short and tall varieties in mixtures with cowpea in the Sudan savanna of Nigeria: land equivalent ratio, grain yield and system productivity index (Odo), 435

Sowing date and its effect on the growth and yield of lentil in a rainfed Mediterranean environment (Silim, Saxena and Erskine), 145

SPVD, *see* Sweet potato virus disease

Stress Responses in Plants: Adaptation and Acclimation Mechanisms, ed. by R. G. Alscher and J. R. Cumming, reviewed by R. B. Austin, 447

Sudan and an evaluation of *Rhizobium* survival in two carriers new to the country (Elshafie and Elhussein), 319

Sudan savanna of Nigeria and an evaluation of short and tall sorghum varieties in mixtures with cowpea there: land equivalent ratio, grain yield and system productivity index (Odo), 435

Sugarcane in north central India and the effect of planting technique and planting density on the yield of late planted crops (Yadav, Kumar and Verma), 281

Sustainable Agriculture in Temperate Zones, ed. by C. A. Francis, C. B. Flora and L. D. King, reviewed by J. K. Coulter, 443

Sweet potato virus disease (SPVD) and its effects on the yield of sweet potato genotypes in Cameroon (Ngeve and Bouwkamp), 221

System of upland rice and maize cropping and improving its productivity: farmer cropping choices or researcher cropping pattern trapezoids? (Fujisaka), 253

System productivity index, land equivalent ratio and grain yield used in an evaluation of short and tall sorghum varieties in mixtures with cowpea in the Sudan savanna of Nigeria (Odo), 435

Systems of rain-fed crop production in upland Balochistan: wheat (*Triticum aestivum*), barley (*Hordeum vulgare*) and forage legumes (*Vicia* species) (Rees, Islam, Samiullah, Rehman, Raza, Qureshi and Mehmood), 53
Systems-based research groups and their role in institutionalizing the farming systems perspective in multi-commodity research institutes (Spencer), 1

Target groups and their identification for agricultural research: the categorization of rice farmers in the Dominican Republic (Doorman), 243
Tea (*Camellia sinensis*) and its responses to irrigation and fertilizer. I. Yield; II. Water use (Stephens and Carr), 177
Tea (*Camellia sinensis*) and the use of growth measurements and foliar nutrient content as criteria for clonal selection (Nyirenda), 47
Technique of planting and density of planting and their effect on yield of late planted sugarcane in north central India (Yadav, Kumar and Verma), 281
Tepary bean and the effects of water, nitrogen and competition on its growth, yield and yield components when field grown (Nelson, Nabhan and Robichaux), 211
Thesaurus of Agricultural Organisms: Pests, Weeds and Diseases, compiled and ed. by Derwent Publications, reviewed by P. R. Scott, 446
Tied ridge cultivation and its effect on the yield of maize and a maize/cowpea relay in the Gambia (Wright, Posner and Doll), 269
Time to flowering in six annual crops and its reliable prediction I. The development of simple models for fluctuating field environments (Summerfield, Roberts, Ellis and Lawn), 11
Timing and intensity of defoliation and its effect on growth, yield components and grain yield in maize (Yao, Yeboua and Kafrouma), 137
Tomato (*Lycopersicon esculentum*) and observations on insect infestation and damage in cowpea (*Vigna unguiculata*) when intercropped with it in a rain forest area of Nigeria (Ofuya), 407
Trifolium species native to Ethiopia intercropped with wheat (Kahurananga), 385
Triticum aestivum, *see* Wheat

Use of Plant Genetic Resources (The), ed. by A. D. H. Brown, D. R. Marshall, O. H. Frankel and J. T. Williams, reviewed by F. G. H. Lupton, 445
Useful Plants of Ghana: West African Uses of Wild and Cultivated Plants, by D. K. Abbiw, reviewed by R. R. B. Leakey, 341

Vicia species, *see* Forage legumes
Vigna unguiculata, *see* Cowpea
Virus disease of sweet potato (SPVD) and its effects on the yield of sweet potato genotypes in Cameroon (Ngeve and Bouwkamp), 221

Water stress and the use of remote sensing to assess its effects on wheat (Mahey, Singh, Sidhu and Narang), 423
Water, nitrogen and competition effects on the growth, yield and yield components of field-grown tepary bean (Nelson, Nabhan and Robichaux), 211
Weed control in rainfed lowland rice in Senegal: an agro-economic analysis of field trials from a farming systems research perspective (Posner and Crawford), 231
Weeds and their role in the productivity of Amazonian bush fallow agriculture (Staver), 287
Wheat (*Triticum aestivum*), barley (*Hordeum vulgare*) and forage legumes (*Vicia* species) in rain-fed crop production systems of upland Balochistan: (Rees, Islam, Samiullah, Rehman, Raza, Qureshi and Mehmood), 53
Wheat and alfalfa productivity under intercropping (Abdel Magid, Ghoneim, Rabie and Sabrah), 391
Wheat and the use of remote sensing to assess the effects of water stress (Mahey, Singh, Sidhu and Narang), 423
Wheat grain yield and its physiology in an irrigated tropical environment (Ishag and Ageeb), 71
Wheat intercropped with an Ethiopian *Trifolium* species (Kahurananga), 385
Winged bean and dry matter and nitrogen accumulation and partitioning in field grown crops (Weil and Belmont), 323
Winged bean and its effects on a following maize crop (Weil and Samarnayake), 329

Yield and growth of lentil in a rainfed Mediterranean environment as affected by sowing date (Silim, Saxena and Erskine), 145
Yield and growth of maize genotypes during dry seasons in northern Nigeria (Yunusa and Gworgwor), 397
Yield components, grain yield and growth in maize as affected by the intensity and timing of defoliation (Yao, Yeboua and Kafrouma), 137
Yield of grain and its physiology in wheat in an irrigated tropical environment (Ishag and Ageeb), 71
Yield of grain, land equivalent ratio and system productivity index used in an evaluation of short and tall sorghum varieties in mixtures with cowpea in the Sudan savanna of Nigeria (Odo), 435

Yield of late planted sugarcane in north central India as affected by planting technique and planting density (Yadav, Kumar and Verma), 281
Yield of maize and a maize/cowpea relay in the Gambia as affected by tied ridge cultivation (Wright, Posner and Doll), 269
Yield of sweet potato genotypes in Cameroon as affected by sweet potato virus disease (SPVD) (Ngeve and Bouwkamp), 221
Yield, growth and leafminer damage in a mixed planting of potato cultivars in the cool tropics (Midmore and Alcazar), 305
Yield, growth and quality of okra (*Abelmoschus esculentus*) as affected by age of harvesting after pod set (Iremiren, Osara and Okiy), 33
Yield, yield components and growth of field-grown tepary bean as affected by water, nitrogen and competition (Nelson, Nabhan and Robichaux), 211
